Opposition to puente power plant and support for renewable energy alternative

As a 36 year long resident of Oxnard and advocate for low income folks. I am happy that you will be looking at alternatives in green energy. We thank you for this and hope that the research proves to be effective. Too often, others feel that a community serving many low income should be the site of polluting practices because the thought is that we, the community, will not oppose. We look forward to hearing the alternatives. We need to ensure we have clean air.
