## **Reject the Puente Power Project**

Dear Submit your public comment,

I am writing to urge you to reject the Puente Power Project.

More fossil fuel power plants should be considered when solar panels cover all large parking lots, and renewable energy storage is built out. Only if the fossil fuel power plant resulted in fast charge infrastructure being built out is it a step toward sustainability.

This project is uneconomical and unnecessary. Puente would cost more than twice as much as it would cost to meet the same electricity needs with renewables. Clean energy solutions can create more good, local jobs in the Oxnard area for a fraction of the cost.

This is a project whose time has passed. Now more than ever, Californias leadership is essential to lead our nation toward a clean energy economy we aren't going to get there by building uneconomical projects that lock in more pollution and dependence on fossil fuels.

I urge you to reject the Puente Power Project.

Sincerely, Jeff Tischler
