Dear Submit your public comment,

Please reject the Puente Power Project, and any other fossil fuel based power plants. This project would be damaging to the environment and our citizens. The city of Oxnard already has some of the highest asthma rates in the state. We should be working to clean the air and move away from polluting sources of power generation.

This project is also uneconomical and unnecessary. Puente would cost more than twice as much as it would cost to meet the same electricity needs with renewables. Clean energy solutions can create more good, local jobs in the Oxnard area for a fraction of the cost.

Now more than ever, Californias leadership is essential to move toward a clean energy economy, and we aren't going to get there by building uneconomical projects that lock in more pollution and dependence on fossil fuels.

Reject the Puente Power Project.

Sincerely, Karl Twombly
