## **Please Reject the Puente Power Project**

Dear Submit your public comment,

I am writing to urge you to reject the Puente Power Project.

This is not the time to be building additional fossil fuel power plants. In addition, the proposed siting of this plant would exacerbate a huge asthma problem in the city of Oxnard.

The plant is a waste of money since the same level of power could be generated by renewables for half the price. Rather than creating a "white elephant", much more effort should be put into energy storage and creating a smarter electrical grid and better transmission facilities.

California is a world leader in the fight to create a sustainable planet and a clean energy economy. This project goes in exactly the opposite direction and should be disapproved.

Please reject the Puente Power Project.

Sincerely,
