Reject the Puente Power Project

Dear Submit your public comment,

Please reject the Puente Power Project. It's in a bad location, is too expensive and it's not a renewable energy project -- which is what we need.

This project would damage California communities, including the city of Oxnard which already has some of the highest asthma rates in the state. Instead of supporting projects like this one that add more pollution to our air and endanger public health, we should be working harder to clean the air.

Additionally, this project is uneconomical and unnecessary. Puente would cost more than twice as much as a project that would provide the same amount of electricity through renewables. Clean energy solutions can create more good, local jobs in the Oxnard area for a fraction of the cost.

This is a project whose time has passed. Now more than ever, California must lead the way for the country and the world toward a clean energy economy. This project which is uneconomical, pollution-generating and uses fossil fuel is the opposite of the way we need to go.

Please reject the Puente Power Project.

Sincerely, Johanna Wald
