I live in Santa Barbara. Our dirty natural gas energy comes from the plants in Oxnard. I support the Oxnard folks who are fighting to stop a polluting (and unnecessary) power plant from being built. I stand for environmental justice, climate justice, clean energy, good jobs and the planet.

Solar, wind and water power are getting cheaper. Fossil fuels are becoming more scarce and more expensive. Why lock ourselves into paying for a peaker power plant that is not needed? Micro-grids in the locations where there are now sub stations is the best plan.
