## **Against the Puente Power Project**

The building of the gas fired power plant is ignoring the goal of this great state to immediately transition to renewable energies. With climate change effecting the weather, the temperature of the oceans, the melting of the ice caps, and so much more, building another archiac fossil fuel facility to add to the problem seem not to be well thought out. I know you have heard of all the other reasons not to build this plant, so why are you?

Spent the monies renewable that will also create long lasting jobs and something the citizens can be proud of.

I am strong against the creation of Puente Power project.
