Oxnard Power Plant

I disagree with all the talking points now being circulated for people to object to the plant. I think the plant needs to be built. Most of the people protesting appear to have no real grasp of the facts, but a knee jerk attitude.

I have two environmental licences plus other licences and if you talk to most of the people objecting , all they know that it sounds bad from all that they read from what is being circulating so it must be bad

I also own property nearby to where the power plant will be constructed.
