Puente power project

I live in Oxnard Shores mobile home park on 5th Street. I'm very concerned about my health since I have asthma, and the ill effects this power plant would do to my health! But even if more concern to me is the air and wildlife in the area that this new plant would have such a negative impact! It is our responsibility as citizens to protect the environment for all the creatures that can't speak for themselves! Especially when there are wind and solar power alternatives which makes this plant obsolete! I have lived in Oxnard Shores since 1982, and I walk on the beach towards the power plants a lot! Please do the right thing and vote No to allowing this awful power plant plan to go forward! Please listen to the facts given by EDC attorney, Linda Kropp and understand why it's necessary to not allow another plant in our beautiful backyard!
