No on Puente Power Plant. Environmental Justice now.

The era of fossil fuels is ending. Because of climate change, it is time to move to renewable energy as quickly as possible for the sake of future generations. Fortunately we now have alternatives. If we rate payers are going to pay hundreds of millions of dollars for a new energy generation facility, let it be for a beautiful array of solar panels and battery storage. As residents of Santa Barbara, my family and I have benefited from the Oxnard power plants built in neighborhoods poor minority communities--not understanding how pollution from these facilities was causing health problems like childhood asthma. We need to end this shameful era of unconcern for the sufferings of others, and we now have the ability to do so. Stop harming the children of Oxnard. Start building a clean renewable energy system. Deny the polluting gas-fueled Puente power plant.
