Subject: **VICTORVILLE 2 HYBRID POWER PROJECT (07-AFC-1C) – CERTIFICATION
TERMINATION**

On April 19, 2018, the City of Victorville submitted a letter requesting to terminate the Energy Commission license for the Victorville 2 Hybrid Power Project.

Background

The Victorville 2 Hybrid Power Project was certified by the Energy Commission on July 16, 2008 as a 563-megawatt (MW) hybrid facility consisting of up to 50 megawatts generated through solar trough technology. The facility would be located in the City of Victorville, in San Bernardino County.

On June 12, 2013, the Energy Commission approved a request for a 5-year extension to the start of construction deadline for the Victorville 2 Hybrid Power Project, from July 16, 2013, to July 16, 2018. Construction on the project has not started.

Analysis

Staff reviewed the City of Victorville's letter requesting termination of the Victorville 2 project and has concluded that no construction activity on the project has taken place. Therefore, the requested termination would not result in any significant impacts on the environment, or to public health and safety, or result in any violation of laws, ordinances, regulations or standards.

Conclusion

Based on its analysis, Staff recommends the termination of the Victorville 2 Hybrid Power Project certification.
