## **Puente Peaker Plant Hearing**

I wish to thank to members of the Commission for their heroic and attentive listening to testimony and public comment in Oxnard yesterday.

Your attention to detail while still holding on to the Big Picture was appreciated, and although I heard only some of your questions to NRG, I greatly valued your ability to deal with lapses in knowledge and data and the public's need to understand NRG's design and its cost. I am one of the public who is very concerned that any location in California could be saddled with the side effects of a natural-gas installation and its pollution for 20 or 30 years when, as a state, we have worked so hard to put fossil fuels behind us.

Cordially,  
Vicki Paul, Ventura
