Puente power plant

Thank you for rejecting the puente power plant in Oxnard. The fabrication of such a facility is unacceptable to our community posing hazards to our health and economic well-being. I'm also hoping that we can move to ban fracking in our community...it is a disgrace that California leads the nation in fracking, and with our Ventura county high on the list of fracking communities. Of course this is also a health hazard, economically impacts our property and businesses, and ultimately results in costly hazardous issues such as poisoned water. I hope we can move forward in banning this practice.

Thank you for rejecting the Puente nightmare.
