Re: Mission Rock Energy Center Project

Dear Mr. Angulo:

CH2M HILL is assisting the Calpine Corporation (Calpine) with the preparation of an Application for Certification for the Mission Rock Energy Project. Calpine plans to develop new electrical power generation in Southern California and has identified a site for the proposed Mission Rock Energy Center (MREC) near Santa Paula, Ventura County, California. The Project includes the following associated linears: a 6.6-mile-long 230 kV generator tie-line to SCE Santa Clara Substation, a 2.4-mile-long pipeline along Todd Road and the Southern Pacific Railroad right-of-way to Southern California Edison's Lines 404/406, and 1.7-mile-long pipeline in the generator tie-line ROW to the Limoneira recycled water pipeline.

The project is located on the Santa Paula and Saticoy, CA, 7.5 Minute USGS quadrangle with the legal descriptions:

T 03N, R 21W; T03N, R 22W; Sections 25-33 and 36.

Please see the attached map, which shows the Project and all associated linears.

A search of the Sacred Land files by the Native American Heritage Commission (NACH) in October 8, 2015 failed to indicate the presence of Native American sacred sites in the immediate Project vicinity. A California Historical Resources Information System literature search was completed on September 17, 2015 by staff at the South Central Coastal Information Center (SCCIC) located at California State University, Fullerton, California. Five cultural resources, all historic era resources, are previously documented within the study area. An archaeological pedestrian survey conducted in October 2015 by CH2M HILL identified additional historic era resources within the Project. To date, no prehistoric resources have been identified within the Project, either by the archival research or the pedestrian survey. Surveys are not yet complete for the Project.

If you know of any traditional cultural properties or values (e.g., burial sites, religious sites, or gathering sites) within the Project area shown on the enclosed map, or if you have any concerns regarding issues related to the overall Project, please contact me at (714) 435-6044 or by mail; you may also contact me at gloriella.cardenas@ch2m.com. Follow up phone calls will be made starting October 19, 2015 to solicit comments regarding this project. Your project comments and concerns are important to us. I look forward to hearing from you in the near future.

Respectfully yours,

Gloriella Cardenas, M.A., RPA

Dear PeuYoKo Perez:

CH2M HILL is assisting the Calpine Corporation (Calpine) with the preparation of an Application for Certification for the Mission Rock Energy Project. Calpine plans to develop new electrical power generation in Southern California and has identified a site for the proposed Mission Rock Energy Center (MREC) near Santa Paula, Ventura County, California. The Project includes the following associated linears: a 6.6-mile-long 230 kV generator tie-line to SCE Santa Clara Substation, a 2.4-mile-long pipeline along Todd Road and the Southern Pacific Railroad right-of-way to Southern California Edison's Lines 404/406, and 1.7-mile-long pipeline in the generator tie-line ROW to the Limoneira recycled water pipeline.

The project is located on the Santa Paula and Saticoy, CA, 7.5 Minute USGS quadrangle with the legal descriptions:

T 03N, R 21W; T03N, R 22W; Sections 25-33 and 36.

Please see the attached map, which shows the Project and all associated linears.

A search of the Sacred Land files by the Native American Heritage Commission (NACH) in October 8, 2015 failed to indicate the presence of Native American sacred sites in the immediate Project vicinity. A California Historical Resources Information System literature search was completed on September 17, 2015 by staff at the South Central Coastal Information Center (SCCIC) located at California State University, Fullerton, California. Five cultural resources, all historic era resources, are previously documented within the study area. An archaeological pedestrian survey conducted in October 2015 by CH2M HILL identified additional historic era resources within the Project. To date, no prehistoric resources have been identified within the Project, either by the archival research or the pedestrian survey. Surveys are not yet complete for the Project.

If you know of any traditional cultural properties or values (e.g., burial sites, religious sites, or gathering sites) within the Project area shown on the enclosed map, or if you have any concerns regarding issues related to the overall Project, please contact me at (714) 435-6044 or by mail; you may also contact me at gloriella.cardenas@ch2m.com. Follow up phone calls will be made starting October 19, 2015 to solicit comments regarding this project. Your project comments and concerns are important to us. I look forward to hearing from you in the near future.

Respectfully yours,

Dear Ms. Cardenas,

Haku. The Coastal Band of the Chumash Nation (the “Coastal Band”) has received your letter regarding the above-referenced project, dated October 13, 2015. Thank you for the information regarding the project. The Coastal Band is anxious to meet with you to engage in meaningful consultation on this project.

The protection of our ancient village sites, burial grounds, traditional gathering and ceremonial locations, and other cultural, religious and historic resources is extremely important to us, as we trust it is to you as well. We look forward to meeting with you in the spirit of cooperation and mutual respect, at an appropriate time and place, to discuss in more detail the proposed project. You may reach me at cbcn.nahc.ventura@gmail.com.

Also, we wish to remind you that the Coastal Band is only one of several Chumash tribal organizations that may be interested in this project. We urge you to contact all other Chumash organizations and any other Native American tribal organizations that may be impacted.

Ksukuwiyuw (Respectfully),

Isabel M Ayala,
Coastal Band of the Chumash Nation

Good Morning Ms. Ayala,

We are in the beginning stages of conducting cultural studies which includes reaching out to interested parties as yourself, and your input is important to us and it will be included in our reports. We are conducting the initial project data sharing on behalf of the California Energy Commission and we will report all responses comments, and requests as received to them as well.

Regarding meetings and site visits, it is my understanding the CEC will be involved in arranging and I will pass your requests to them directly. As we are at the start of the project, no formal meetings or findings have been made. We will keep you updated as schedule and information is known.

Re: Mission Rock Energy Center Project

To Whom It May Concern:

CH2M HILL is assisting the Calpine Corporation (Calpine) with the preparation of an Application for Certification for the Mission Rock Energy Project. Calpine plans to develop new electrical power generation in Southern California and has identified a site for the proposed Mission Rock Energy Center (MREC) near Santa Paula, Ventura County, California. The Project includes the following associated linears: a 6.6-mile-long 230 kV generator tie-line to SCE Santa Clara Substation, a 2.4-mile-long pipeline along Todd Road and the Southern Pacific Railroad right-of-way to Southern California Edison's Lines 404/406, and 1.7-mile-long pipeline in the generator tie-line ROW to the Limoneira recycled water pipeline.

The project is located on the Santa Paula and Saticoy, CA, 7.5 Minute USGS quadrangle with the legal descriptions:

T 03N, R 21W; T03N, R 22W; Sections 25-33 and 36.

Please see the attached map, which shows the Project and all associated linears.

A search of the Sacred Land files by the Native American Heritage Commission (NACH) in October 8, 2015 failed to indicate the presence of Native American sacred sites in the immediate Project vicinity. A California Historical Resources Information System literature search was completed on September 17, 2015 by staff at the South Central Coastal Information Center (SCCIC) located at California State University, Fullerton, California. Five cultural resources, all historic era resources, are previously documented within the study area. An archaeological pedestrian survey conducted in October 2015 by CH2M HILL identified additional historic era resources within the Project. To date, no prehistoric resources have been identified within the Project, either by the archival research or the pedestrian survey. Surveys are not yet complete for the Project.

If you know of any historic properties or values within the Project area shown on the enclosed map, or if you have any concerns regarding issues related to the overall Project, please contact me at (714) 435-6044 or by mail; you may also contact me at gloriella.cardenas@ch2m.com. Your project comments and concerns are important to us. I look forward to hearing from you in the near future.

Re: Mission Rock Energy Center Project

Dear Mr. Johnson:

CH2M HILL is assisting the Calpine Corporation (Calpine) with the preparation of an Application for Certification for the Mission Rock Energy Project. Calpine plans to develop new electrical power generation in Southern California and has identified a site for the proposed Mission Rock Energy Center (MREC) near Santa Paula, Ventura County, California. The Project includes the following associated linears: a 6.6-mile-long 230 kV generator tie-line to SCE Santa Clara Substation, a 2.4-mile-long pipeline along Todd Road and the Southern Pacific Railroad right-of-way to Southern California Edison's Lines 404/406, and 1.7-mile-long pipeline in the generator tie-line ROW to the Limoneira recycled water pipeline.

The project is located on the Santa Paula and Saticoy, CA, 7.5 Minute USGS quadrangle with the legal descriptions:

T 03N, R 21W; T03N, R 22W; Sections 25-33 and 36.

Please see the attached map, which shows the Project and all associated linears.

A search of the Sacred Land files by the Native American Heritage Commission (NACH) in October 8, 2015 failed to indicate the presence of Native American sacred sites in the immediate Project vicinity. A California Historical Resources Information System literature search was completed on September 17, 2015 by staff at the South Central Coastal Information Center (SCCIC) located at California State University, Fullerton, California. Five cultural resources, all historic era resources, are previously documented within the study area. An archaeological pedestrian survey conducted in October 2015 by CH2M HILL identified additional historic era resources within the Project. To date, no prehistoric resources have been identified within the Project, either by the archival research or the pedestrian survey. Surveys are not yet complete for the Project.

If you know of any historic properties or values within the Project area shown on the enclosed map, or if you have any concerns regarding issues related to the overall Project, please contact me at (714) 435-6044 or by mail; you may also contact me at gloriella.cardenas@ch2m.com. Your project comments and concerns are important to us. I look forward to hearing from you in the near future.

Respectfully yours,
