Appendix 2D  
Waste Water Will-Serve Letter

August 11, 2014

Mitchell D. Weinberg  
Director, Strategic Origination & Development  
Calpine Corporation  
4160 Dublin Boulevard, Suite 100  
Dublin, CA 94568

Re: Can Serve Letter  
Proposed Calpine Mission Rock Energy Center

Mr. Weinberg,

Southern California Waste Water received your request for waste water services availability for up to 100,000 gallons per day of reverse osmosis reject water from the proposed Mission Rock Energy Center to be located at 1025 Mission Rock Road, Santa Paula.

It is understood that Mission Rock Energy Center is proposing to construct a natural gas fired power generation facility utilizing gas turbine technology at the subject property. The waste water is a product of reverse osmosis treatment to demineralize water for injection into the gas turbine for emissions control.

This letter is to inform you that Southern California Waste Water has sufficient resources to accommodate your request for service.

Please call me at the office at (805)525-8315 if you need further clarification.

Respectfully submitted,

Charles R. Mundy  
Vice President of Environmental Compliance and Facility Operations  
Southern California Waste Water
