No To Mission Rock Peaker Plant Proposal

As a citizen of Santa Paula for 66 years....I am offering my disapproval of the Mission Rock Energy Plant proposal for Mission Rock Road. Santa Paula is not interested in antiquated technology located near our Santa Clara River bed that will impact endangered species, cause air pollution, create an eyesore with tall towers and lights at night. I object to Santa Paula being considered a sight because of low socioeconomic conditions in the area.....How about Malibu or Santa Barbara? See what happens there.
