No Mission Rock Energy Center

I STRONGLY oppose the Mission Rock Energy Center. I feel that bringing this dangerous plant to Santa Paula will be detrimental to any future positive growth to Santa Paula as it will cause increased air pollution, light pollution and increased traffic. The rest of California is moving away from this type of outdated, inefficient and dangerous gas-fueled peaker power plant technology. It is my feeling we should be focusing on sustainable (solar or wind) alternatives to help meet the state's mandate of 50% renewable energy by 2030.
