## **Opposed to site of Mission Rock Energy Center**

The beautiful farmlands of Santa Paula and the scenic environment enhanced by the clean air of west Venture County should not be destroyed by placement of a toxin spewing energy plant. For decades Santa Paula has been the dumping grounds for every bad project in the County.... jail, rock quarry, pesticide dumps, wood recycling centers.... It has to stop. Adding injury to the insult, the site is in a known flood plain. I have witnessed many times when the river has crested and surface water inundated the area. As an asthmatic, another carbon spewing plant is not what I want to breath!
