Mission Rock project

I am writing as a resident of the small agricultural town of Santa Paula to implore you not to locate this plant in my town. We are probably the lowest income town in ventura county and it seems that any questionable projects are always placed in our town. We already have severe traffic problems and we feel this project will only add to them. A disaster related to this plant would unfairly target the people living in this small community. It is located way to close to the town itself and other sites ive heard being considered are farther away from populated areas and would be much more appropriate.

Thank you for listening to my concerns

Shannon Nelson
