## **"NO" to peaker plant on Mission Rock Road**

I have been a SP resident since 1975 and live only a mile from Briggs Road, have worked in the medical field for over 25 years and feel that putting this type of power plant in our valley is contraindicated for so many reasons. Fossil fuel is on its way out, everyone knows this, why build and pay on a "dead horse". The location is in our river bed and our agricultural valley. We have already had serious issue with the hazardous waste storage that blew up a year ago on that same road! Santa Paula needs to keep our air quality as good as possible due to our large elderly and youth populations. The future for energy needs to be for cleaner, more responsible to the environment types of fuel. This project does not qualify as such.
