Subject: **MISSION ROCK ENERGY CENTER
REVISED DATA ADEQUACY RECOMMENDATION (15-AFC-02)**

On December 30, 2015, Mission Rock Energy Center, LLC, (Applicant) filed an Application for Certification (AFC) to construct and operate an electrical generating facility in Ventura County, California, approximately 2 miles west of Santa Paula, near State Highway 126. Mission Rock would be a natural gas-fired, nominal 255-megawatt electrical generating facility. Mission Rock would also provide 100 MWhr (25 MW for 4 hours) of battery storage and synchronous condenser clutch technology to provide ancillary and grid reliability services.

PROJECT DESCRIPTION

The five GE LM6000 CTGs would be equipped with selective catalytic reduction (SCR) air emissions control equipment and associated support equipment for nitrogen oxide (NOx) and carbon monoxide (CO) control. Each CTG would be capable of generating approximately 57 MW (gross) at base load. The project is expected to have an overall annual availability of 92 to 98 percent, including scheduled and forced outage occurrences.

PROJECT CONSTRUCTION AND OPERATION

As a peaking power plant, Mission Rock is expected to operate during periods of increased need on the grid. This includes: times of high electrical load, during periods when intermittent renewable source generation fluctuates; when base load plants are not operating or being brought on-line; or during emergency conditions. Mission Rock would provide a resource to balance the variability of renewable resources and satisfy peak energy and capacity needs during high-load events.

Staff's January 29, 2016, initial data adequacy review of the Mission Rock AFC determined that the AFC did not meet all the requirements listed in Title 20, section 1704, and Division 2, Chapter 5, Appendix B of the California Code of Regulations for the 12-month licensing process. Specifically, the AFC was deficient in 11 of 22 areas: air quality, biological resources, cultural resources, project overview, reliability, soils, traffic and transportation, transmission system design, visual resources, waste management and water resources.

Staff has reviewed the Data Adequacy (Supplement A) information submitted by the Applicant on April 29, 2016. Supplement A included the “Letter of Completeness” provided by the Ventura County Air Pollution Control District. The AFC now meets the above-listed requirements in all eleven of the previously deficient technical disciplines. Therefore, staff has determined that the AFC, with Supplement A now contains all the information required by the 12-month AFC process.

Attachment A is a summary table, and **Attachment B** contains the revised data adequacy worksheets for the eleven technical disciplines previously determined to be data inadequate.

At the Energy Commission’s Business Meeting on May 17, 2016, I will recommend that the Energy Commission accept the Mission Rock AFC as data adequate pursuant to California Code of Regulations, Title 20, Section 1709 (d). If the Energy Commission accepts staff’s recommendation, the Energy Commission may deem the application for certification with the supplemental information complete and appoint a Committee.

If you have any questions, please contact Mike Monasmith, staff’s Project Manager, at (916) 654-4894 or via email at mike.monasmith@energy.ca.gov.

The AFC says the project "will not cause loss or fill of any wetlands" (page 5.2-17). It also states the project will not "affect waters of the United States" or State waters (page 5.2-29). However there is no data to support this claim. The National Wetland Inventory data is not accurate enough and does not provide current conditions of the area to make a determination for direct and indirect impacts. Provide completed wetland delineation forms using the 1987 Army Corps of Engineers Wetlands Delineation Manual (United States Army Corps of Engineers, 1987), including delineation of waters jurisdictional to the State of California within 250 feet of the project area (including all linear facilities).

Pages 5.13-1 – 5.13-6 Section 5.13.1	Yes	
Appendix B (g) (6) (C)	In consultation with Energy Commission staff, identify: i) any designated scenic roadways or scenic corridors and any visually sensitive areas that would be affected by the proposed project, including recreational and residential areas; and ii) the locations of the key observation points to represent the most critical viewing locations from which to conduct detailed analyses of the visual impacts of the proposed project. Indicate the approximate number of people using each of these sensitive areas and the estimated number of residences with views of the project. Also identify any major public roadways and trails of local importance that would be visually impacted by the project and indicate the types of travelers (e.g., local residents, recreationists, workers, commuters, etc.) and the approximate number of vehicles, bicyclists, and/or hikers per day. Appendix B (g) (6) (E)	Provide the cooling tower and heat recovery steam generator (HRSG) exhaust design parameters that affect visible plume formation. For the cooling tower, data shall include heat rejection rate, exhaust temperature, exhaust mass flow rate, liquid to gas mass flow ratio, and, if the tower is plume-abated, moisture content (percent by weight) or plume-abated fogging curve(s). The parameters shall account for a range of ambient conditions (temperature and relative humidity) and proposed operating scenarios, such as duct firing and shutting down individual cells. For the heat recovery steam generator exhausts, data shall include moisture content (percent by weight), exhaust mass flow rate, and exhaust temperature. The parameters must correspond to full-load operating conditions at specified ambient conditions, and shall account for proposed operating scenarios, such as power augmentation (i.e., evaporative coolers, inlet foggers, or steam injection) and duct firing, or proposed HRSG visible plume abatement, such as the use of an economizer bypass. For simple-cycle projects, provide analogous data for the exhaust stack(s).	Appendix 5.1A, Attachment 5.1A-1, Turbine Performance Data (Page 24 of 41)	Yes

SITING REGULATIONS	INFORMATION	AFC PAGE NUMBER AND SECTION NUMBER	ADEQUATE YES OR NO	INFORMATION REQUIRED TO MAKE AFC CONFORM WITH REGULATIONS
Appendix B (g) (14) (C) (v)	For all water supplies intended for industrial uses to be provided from public or private water purveyors, a letter of intent or will-serve letter indicating that the purveyor is willing to serve the project, has adequate supplies available for the life of the project, and any conditions or restrictions under which water will be provided. In the event that a will-serve letter or letter of intent can not be provided, identify the most likely water purveyor and discuss the necessary assurances from the water purveyor to serve the project;	Appendix 2C <u>Data Adequacy Supplemental, p. 5-37</u>	NO <u>YES</u>	Provide information demonstrating Limoneira has adequate supplies for the life of the project. Include a discussion of whether there are any restrictions or seasonal variation in the availability of their supply. Provide information on permitting that will be required for Limoneira to serve the project appropriately treated recycled water.
Appendix B (g) (14) (C) (vi)	For all water supplied which necessitates transfers and/or exchanges at any point, identify all parties and contracts/agreements involved, the primary source for the transfer and/or exchange water (e.g., surface water, groundwater), and provide the status of all appropriate agencies' approvals for the proposed use, environmental impact analysis on the specific transfers and/or exchanges required to obtain the proposed supplies, a copy of any agency regulations that govern the use of the water, and an explanation of how the project complies with the agency regulation(s);	Not applicable	N/A	
Appendix B (g) (14) (C) (vii)	Provide water mass balance and heat balance diagrams for both average and maximum flows that include all process and/or ancillary water supplies and wastewater streams. Highlight any water conservation measures on the diagram and the amount that they reduce water demand; and	Figure 2.1-3 Figure 2.1-4a Figure 2.1-4b <u>Data Adequacy Supplemental, Figures DA5.14-1a and DA5.14-1b Supplemental, pp. 5-37 and 5-38</u>	NO <u>YES</u>	Resolve the following discrepancies regarding wastewater in the water balance diagrams and appropriate sections of the AFC: <ul style="list-style-type: none"> • “The MREC will discharge reverse osmosis reject water to Green Compass” (§ 5.15.1.5, p. 5.15-6) • “Process wastewater, principally RO system reject and chiller system cooling tower blowdown, will be discharge through... Green Compass” (§ 2.1.10.1, p. 2-17) • “The secondary wastewater collection system will collect sanitary wastewater... and route it to an onsite septic tank for discharge through removal by a licensed

				<p>waste hauler" (§ 2.1.10.1, p. 2-17)</p> <ul style="list-style-type: none"> • "MREC will discharge industrial and sanitary wastewater to Green Compass" (Table 5.15-5, p. 5.15-15) • "Wastewater from facility sinks, toilets, and showers will be disposed of to the sanitary sewer." (§5.14.4.2, p. 5.14-10) • "Industrial wastewater consisting of reverse osmosis system reject and cooling tower blowdown from the chiller system will be discharged through Green Compass" (Executive Summary, ES-1) • "No wastewater will be generated from the water treatment process or IX resin regeneration, since regeneration of the cationic and anionic resin will occur off-site via contracted vendor. The non-oily waste stream will pass through a walnut shell-activated carbon vessel followed by a surge tank and 5 micron bag filters before being sent to the waste water tank and eventually recycled back to the raw water storage tank. Sanitary waste will be sent to an onsite septic system." (Appendix 2A, page 2A-20)

Appendix B (g) (14) (C) (viii)	<p>For all projects which have a discharge, provide a copy of the will-serve letter, permit or contract with the public or private entity that will be accepting the wastewater and contact storm water from the project. The letter, permit or contract, if possible, shall identify the discharge volumes and the chemical or physical characteristics under which the wastewater and contact storm water will be accepted.</p> <p>In the event that a will-serve letter, permit, or contract cannot be provided, identify the most likely wastewater/storm water entity and discuss why the applicant was unable to secure the necessary assurances to serve the project's wastewater/storm water needs. Also, discuss the term of the wastewater service to the project, whether the wastewater entity has adequate permit capacity for the volume of wastewater from the project and has adequate permit levels for the chemical/physical characteristics of the project's wastewater and storm water for the life of the project, and any issues or conditions/restrictions the wastewater entity may impose on the project.</p>	<p>Appendix 2D <u>Data Adequacy Supplemental Attachment DA5.15-1</u></p>	<p>NO YES</p>	<p>Once the discrepancies are resolved regarding wastewater disposal methods, provide necessary information to address the proposed methods of disposal.</p>
Appendix B (g) (14) (D)	<p>Identify all project elements associated with stormwater drainage, including a description of the following:</p>			
Appendix B (g) (14) (D) (i)	<p>Monthly and/or seasonal precipitation and stormwater runoff and drainage patterns for the proposed site and surrounding area that may be affected by the project's construction and operation;</p>	<p>Table 5.15-2, p. 5.15-5 Appendix 5.15A</p>	<p>Yes</p>	
Appendix B (g) (14) (D) (ii)	<p>Drainage facilities and the design criteria used for the plant site and ancillary facilities, including but not limited to capacity of designed system, design storm, and estimated runoff;</p>	<p>Appendix 5.15A</p>	<p>Yes</p>	

SITING REGULATIONS	INFORMATION	AFC PAGE NUMBER AND SECTION NUMBER	ADEQUATE YES OR NO	INFORMATION REQUIRED TO MAKE AFC CONFORM WITH REGULATIONS
Appendix B (g) (14) (D) (iii)	All assumptions and calculations used to calculate runoff and to estimate changes in flow rates between pre- and post-construction; and	Appendix 5.15A	Yes	
Appendix B (g) (14) (D) (iv)	A copy of applicable regional and local requirements regulating the drainage systems, and a discussion of how the project's drainage design complies with these requirements.	Appendix 5.15A	Yes	
Appendix B (g) (14) (E)	An impacts analysis of the proposed project on water resources and a discussion of conformance with water-related LORS and policy. This discussion shall include:			
Appendix B (g) (14) (E) (i)	The effects of project demand on the water supply and other users of this source, including, but not limited to, water availability for other uses during construction or after the power plant begins operation, consistency of the water use with applicable RWQCB basin plans or other applicable resource management plans, and any changes in the physical or chemical conditions of existing water supplies as a result of water use by the power plant;	Executive Summary, ES-2 § 5.15.1.4, p. 5.15-6	Yes	
Appendix B (g) (14) (E) (ii)	If the project will pump groundwater, an estimation of aquifer drawdown based on a computer modeling study shall be conducted by a professional geologist and include the estimated drawdown on neighboring wells within 0.5 mile of the proposed well(s), any effects on the migration of groundwater contaminants, and the likelihood of any changes in existing physical or chemical conditions of groundwater resources shall be provided;	Not applicable	N/A

SITING REGULATIONS	INFORMATION	AFC PAGE NUMBER AND SECTION NUMBER	ADEQUATE YES OR NO	INFORMATION REQUIRED TO MAKE AFC CONFORM WITH REGULATIONS
Appendix B (g) (14) (iii)	The effects of construction activities and plant operation on water quality and to what extent these effects could be mitigated by best management practices;	Executive Summary, ES-1 § 5.15.4, p. 5.15-14 § 5.14.1.2, p. 5.14-3 § 5.14.4.1, p. 5.14-9 § 5.14.4.2, p. 5.14-10	Yes	
Appendix B (g) (14) (iv)	If not using a zero liquid discharge project design for cooling and process waters, include the effects of the proposed wastewater disposal method on receiving waters, the feasibility of using pre-treatment techniques to reduce impacts, and beneficial uses of the receiving waters. Include an explanation why the zero liquid discharge process is “environmentally undesirable,” or “economically unsound;”	<u>Data Adequacy Supplemental, p. 5-39</u>	<u>NO YES</u>	Provide required information to explain why the zero liquid discharge process is “environmentally undesirable,” or “economically unsound.”
Appendix B (g) (14) (v)	If using fresh water, include a discussion of the cumulative impacts, alternative water supply sources and alternative cooling technologies considered as part of the project design. Include an explanation of why alternative water supplies and alternative cooling are “environmentally undesirable,” or “economically unsound;”	Not applicable	N/A	
Appendix B (g) (14) (vi)	The effects of the project on the 100-year flood plain, flooding potential of adjacent lands or water bodies, or other water inundation zones; and	§ 5.15.1.3, p. 5.15-6 Appendix 5.15A <u>Data Adequacy Supplemental, p. 5-39</u>	<u>NO YES</u>	Discuss the project’s conformance with requirements for a Floodplain Development Permit issued by Ventura County (the permit approval or enforcement authority, but for the exclusive authority of the commission to certify sites and related facilities).
Appendix B (g) (14) (vii)	All assumptions, evidence, references, and calculations used in the analysis to assess these effects.	§ 5.15.7, p. 5.15-16	Yes

Appendix B (i) (1) (A)	Tables which identify laws, regulations, ordinances, standards, adopted local, regional, state, and federal land use plans, leases, and permits applicable to the proposed project, and a discussion of the applicability of, and conformance with each. The table or matrix shall explicitly reference pages in the application wherein conformance, with each law or standard during both construction and operation of the facility is discussed; and	Table 5.15-5, p. 5.15-16	Yes	
Appendix B (i) (1) (B)	Tables which identify each agency with jurisdiction to issue applicable permits, leases, and approvals or to enforce identified laws, regulations, standards, and adopted local, regional, state and federal land use plans, and agencies which would have permit approval or enforcement authority, but for the exclusive authority of the commission to certify sites and related facilities.	Table 5.15-5, p. 5.15-16	Yes	
Appendix B (i) (2)	The name, title, phone number, address (required), and email address (if known), of an official who was contacted within each agency, and also provide the name of the official who will serve as a contact person for Commission staff.	Table 5.15-5, p. 5.15-16	Yes	
Appendix B (i) (3)	A schedule indicating when permits outside the authority of the commission will be obtained and the steps the applicant has taken or plans to take to obtain such permits.	Table 5.15-5, p. 5.15-16	Yes
