Santa Paula proposed peaker plant

To whom whom it may concern,

I am a citizen of Santa Paula ca. The proposed peaker plant will be within 1 mile of my home. My family has been here in Santa Paula for 7 generations. We do not want this plant to be constructed. The area you are proposing is near a school where migrant families attend. The parents of these families work for limoneria and live in limoneria homes. They know limoneria co is supporting this construction project and do not want to speak out to there employer. Also many do not have the means to email you as computers are considered a luxury. This is a beautiful valley. Please do not build this here . We have in the last couple of years had a tragic event near the proposed construction site. A business had an explosion and injured fire fighters. We do not want any more opportunities that could pollute our beautiful valley.
