Subject: Mission Rock Energy Center

It would be very helpful to have an update, including a proposed calendar, for those most affected by this project - local residents. There was a Santa Paula meeting scheduled on an old calendar which never happened. Many people have expressed concerns. A summary of concerns and how they are being (or not being) dealt with would be most helpful. It is hard to follow all of the back and forth going on, especially when some concerns seem to have not been addressed. Case in point, the issue of liquefaction and the events considering that this project is within a liquification zone or the fact that part of the road is private property with an agreement in place for use.
