Mission Rock is the wrong path to energy freedom

Please deny Calpine's request to build a fossil-fuel driven power plant on the banks of the Santa Clara River, or anywhere, for that matter. What are we doing putting extremely rare ecosystems in jeopardy by following a path of energy generation that is detrimental to the state of California's plan to seriously reduce greenhouse gas emissions?! It doesn't make long-term sense. For your grandchildren, I beg you to deny this project.
