Santa Paula Workshops and Notifications

Not only has the CEC staff changed the process that was negotiated subsequent to the Thomas Fire, to allow more time for community response, as noted in Docket Number: 15-AFC-02, filed by Mary Ann Krause, AICP for Santa Paula Alliance, on 3/1/2018, the dates conflict in whole or in part with Spring Break for the several School Districts involved, meaning that community members who will be affected by this project, and who wish to provide input at the meetings, may already be scheduled to be on vacation. And only two weeks notice is being given regarding workshop times, making it hard for anyone to schedule or change other commitments.

In addition, no information is being provided in Spanish to a largely Hispanic community and hasn't been since shortly after the last community meeting two years ago. This is simply unacceptable!
