Support Termination of Application, Sierra Club Ventura Chairperson

I fully agree with the request to terminate the Mission Rock Energy application Case 15-AFC-02. A power plant is incompatible on a site 300 feet away from endangered species habitat. It is a bad neighbor to 1000s of acres undergoing riparian restoration by the Nature Conservancy. It produces ecologically disruptive light pollution, noise, human activity and emissions that will never be mitigable to the environment. Permanent denial of the procedure is the only acceptable solution.
