Forecast Modeling Business Rules and Data

Additional submitted attachment is included below.

Steve Uhler's Comment to the California State Energy Resources Conservation and Development Commission.
Docket 15-IEPR-01, IEPR, 2015, 2015.10.20, Workshop
Comment Date: 2015.11.02
Subject: Forecast Modeling Business Rules and Data

Below is a video clip of Chair Robert B. Weisenmiller, Ph.D. Appointment Designation: Engineer/Scientist, <http://www.energy.ca.gov/commissioners/weisenmiller.html>, testifying at a California State Senate informational hearing.

He speaks of a family of forecasting models and supporting data, please listen to what he said.

I am wondering about the the modeling and data used to produce the Draft 2015 Integrated Energy Policy Report.

Was the models and data spoke of in the above video used to produce the report?

Do the models support live input and progressing to confirm model results on a daily or hourly basis?

Are there any key performance indicators provided by the models on a daily or hourly basis?

Where can the public get the business rules and data used in the models so they can do a more complete review of the 2015 IEPR?

thanks,

Steve Uhler
