## **2015 IEPR Update Outline**

Good Morning Raquel,

I too must object to the contents and timeframe for public review of the CEC Draft 2015 IEPR Update, as expressed below by Gene Nelson, PhD. and explained in these docketed comments:

Unfortunately, the Draft 2015 IEPR Update conflicts with language in President Obama's Clean Power Plan and Proclamation directing development of all proven energy production technologies, to insure social justice by lifting billions out of energy poverty and stopping millions of deaths annually, from air pollution.

As the CEC is well aware, relying solely on renewables and fossil fuels for energy production in California, without a clear assessment of the risks and benefits in developing all clean, safe, proven energy producing technologies, will not reduce Greenhouse Gas Emissions (GGE), Energy Poverty, or the continued injustice of projected deaths from air pollution.

Please let me know if I can help prepare an IEPR Update, which is more hopeful and visionary, and includes:

" a complete set of integrated energy system policies, with a clear path towards reducing GGE and delivering clean air and water, sustainable communities and economic prosperity."

Sincerely,

Kirk Gothier
