Docket Number: 15-IEPR-12

End Economic Warfare Against Nuclear Power

The current laws in California constitute a sort of economic warfare against nuclear power. There are subsidies and purchase mandates etc. that are purported to be there in order to reduce CA's GHG emissions but they all exclude nuclear power.

If your goal is "low carbon", the "portfolio" laws should be "low carbon", NOT "renewables". If it is important to have low carbon, the subsidies (if any) should be for "low carbon" not "renewable" energy. Even the COP21 agreement recognizes this. It is time CA does also.

I feel entitled to comment on this because:

A nuclear plant anywhere means less CO₂ everywhere.

Please do what is needed to save the Diablo Canyon nuclear station.
