Lead the way on clean air - save Diablo Canyon

I am writing to express my support for the continued operation of the Diablo Canyon Nuclear Power Plant (DCNPP). DCNPP provides a reliable, safe source of pollution free electricity to Californians. As we have seen in the case of the premature closure of San Onofre nuclear plant, and other nuclear plants around the country, when nuclear plants are shuttered, they are replaced with less safe and more polluting sources of energy (usually natural gas). These are real-world consequences. California frequently leads the way on environmental issues, and I am asking you to once again set an example for other states by preserving Diablo Canyon as a source of clean electricity.
