Support for Diablo Canyon

I would like to express my support for nuclear power in California, specifically the Diablo Canyon nuclear power plant. We need to do everything we can to reduce greenhouse gas emissions, and shutting down a nuclear power plant would be a tragic mistake that would increase greenhouse gas emissions. It would be a regressive move that would erase all the progress we have made. Nuclear power is the largest provider of emission-free power generation in the US, and has the greatest potential to scale and fully displace fossil fuel generation. In fact, California has the opportunity to be a leader in clean energy, and if they want to realize that role, CA needs to embrace its operating nuclear power plants, and encourage the construction of new advanced nuclear technologies. It is time to shed the misguided rhetoric against nuclear power, and embrace a clean energy future driven by nuclear and renewables. Let's move forward, not backwards. Support nuclear power!
