**REVISED EXPRESS TERMS (15-DAY LANGUAGE)**

The revised Express Terms (15-day language) are available on the Energy Commission website at:

The language posted on February 23 (TN 216203) showed changes to Sections 1680–1685 with single strike through (example) to indicate deleted text and single underline (example) to indicate added text. In the 15-day language, changes from the originally proposed language are shown with double strike through (example) to indicate deleted text and double underline (example) to indicate added text. The 15-day language changes include:

1. Modifying the definition of “active” as it applies to utility accounts (§1681(a)).

2. Modifying the methods a building owner or owner’s agent may use to demonstrate building ownership or agency when requesting energy use data from a utility (§1682(a)(1)(B)).

3. Clarifying and simplifying the processes by which a building owner, owner’s agent, or utility may obtain customer permission to share building-level energy use data with a building owner or owner’s agent (§1682(b)(4)).

4. Specifying that a utility will not be required to provide whole-building energy use data more than once in a three-month period (§1682(b)(7)), except for requests made for compliance with the benchmarking and public disclosure requirements.

5. Adding requirements for a building owner or owner’s agent to notify a utility of certain changes when the utility is providing recurring automatic upload of whole-building energy use data (§1682(b)(8)).

6. Removing items from, and making modifications to, the list of metrics the Energy Commission may make available on a public website (§1683(c)(3)).

---

1 A preliminary draft of the revised Express Terms was erroneously posted to the docket as TN 221066 on September 6, 2017, without the notice required by section 44 of Title 1 of the California Code of Regulations. That document has been removed from the electronic docket for this proceeding.
7. Modifying the list of requirements for a local jurisdiction to receive a determination from the executive director of the Energy Commission that compliance with its benchmarking program fulfills the requirements of the state program (§1684(b)(1)(A)).
