Engaging AZ Stakeholders in RETI 2.0

The Sonoran Institute looks forward to participating in the RETI 2.0 process. For the eight years, we have been working with a range of stakeholders to identify suitable areas for large-scale renewable energy generation and transmission throughout the state, and will be releasing at the end of October a RE build-out study in response to the Clean Power Plan. There has been considerable planning in Arizona around RE siting issues that would support RETI 2.0. The Sonoran Institute is committed to multi-state approaches to RE siting, and seeing how RETI 2.0 can align with Arizona's planning efforts.
