Energy Gateway Transmission Expansion

JD Podlesnik, Director Market
Integration

Energy Gateway Transmission Expansion Plan

- Approximately 2,000 new line miles
- Multi-year, multi-billion dollar investment
- Objectives
 - Secure capacity for the long-term benefit of customers
 - Load service needs first, regional needs second
 - Support multiple resource scenarios
 - Secure regulatory and community support
 - Improve reliability

Planning Energy Gateway

- Origins in multiple local and regional transmission planning efforts
- Announced in May 2007
- Designed to ensure a reliable, adequate system capable of meeting current and future customer needs
- Energy Gateway's design supports multiple future resource scenarios by connecting resource-rich areas and major load centers
- Projects continue to be vetted in multiple public forums at the local, regional and interconnection-wide levels

Energy Gateway Program Updates
