WET Program Qualification Forms?

To All Concerned

I represent Powerstar Voltage Optimization, we have the only globally patented voltage optimization system. Our system reduces energy cost at least 8% - 12% with substantial CO2 reduction. We also give a 100% projected savings guarantee and over 6,500 installations. Where can I find pre registration information and if this technology would be approved. I have currently been dealing with Ms Jennifer Nelson at the California Energy Commission. My contact info (717)645-1925 or <http://www.isspower.com> please advise the best way to proceed.

In simple terms our product is the easiest and most effective way to reduce substantial energy cost and CO2 emissions.
