To: Energy - Docket Optical System
Subject: partnering for water program

Importance: High

Hi.

I was on the webinar for the Docket No 15-Water-03 Program. We are a Distributor of Energy Efficiency Products. We are supplying many products for San Diego Gas & Electric for the low income weatherization program, we also work with many weatherization contractors throughout the State of Ca under the PG&E low income program. SDGE is implementing a new water measure program which we are supplying four water saving products that are listed below. We feel we are a natural for offering these and other water measure products. We have lots of supply available to us, were very competitive with great customer service. We would like to be more involed and working with the CEC and other water agencies. Please share our information and let me know how we can help.

Cordially,

Bob Rispoli
Vice President
