Current status on rebate funding

I would like to know what is the status on the December 2015 funding, for the homeowners who take out the grass and replace with rock, drought resistant plants?

I applied earlier in the year, was accepted and now am waiting to hear when I can start my landscaping. With the El Nino in effect, it concerns me having a very (now) dead lawn area. I don't want to end up with a new mud area! :o

(any news that you can send me will be helpful.

Than You very much, Frank Flechsig
