Re: TN 202267; Carlsbad Energy Center Project (07-AFC-6C)
Project Owner's Petition to Remove Obsolete Facilities to
Support Construction of the Carlsbad Energy Center Project

Dear Commissioners:

On May 2, 2014 NRG petitioned (TN #202287-2) the California Energy Commission for permission to begin construction of the Carlsbad Energy Center Project. On May 31, 2014, NRG submitted an amendment to the licensed CECP. It seems to Power of Vision that no construction should commence until the Commission has thoroughly vetted the amendment submitted. It is unclear to the public and interested parties if the Commission will approve the amendment. Since NRG is applying to build a different plant than the one approved by the CEC, it is premature to begin construction until the amended application has received due diligence from the public and the Commission.

Power of Vision urges the Commission to deny the application to begin construction until the amendment has been heard by the public and approved by the CEC.

Sincerely,

Julie Baker
