Petition to Remove Obsolete Facilities to Support Construction of the Carlsbad

Energy Center Project

and

Petition to Amend the Carlsbad Energy

Center Project _____)

Petitioner, Rob Simpson desires to participate fully with the rights and obligations of a party.. (Cal. Code of Regs., tit. 20, § 1207)

Petitioner is a resident of California and a citizen of the United States of America and wishes to preserve his First Amendment right to “petition the Government for a redress of grievances.”

Petitioner has 2 children ages 14 and 16 for whom he intends to preserve the planets ability to maintain human life. Clean energy independence is his clearest path to this future. Petitioner also has family, friends and potential business in the area of the proposed plant. Petitioner interest is relevant to this particular proceeding as he considers the City of Carlsbad to be one of the most beautiful places in the State of California and has travelled there repeatedly for business and pleasure. Significant natural resources exist protected by a city government that has demonstrated leadership in environmental

stewardship. Petitioner also accepts the “Responsibility” identified in the California Environmental Quality Act.

(a) The maintenance of a quality environment for the people of this state now and in the future is a matter of statewide concern.

e) Every citizen has a responsibility to contribute to the preservation and enhancement of the environment.

(f) The interrelationship of policies and practices in the management of natural resources and waste disposal requires systematic and concerted efforts by public and private interests to enhance environmental quality and to control environmental pollution.

(California Public Resources Code section 21000)

Petitioner has demonstrated an interest in California Energy production and power plant licensing before the Commission. Specifically, Russell City Energy Center, Eastshore Energy Center, East Altamont Energy Center, Humboldt Bay Repower Project, others and now Carlsbad Energy Center. Petitioner has prevailed in his appeal to the United States Environmental Protection Agency, Environmental Appeals Board (EAB) petition 08-01 regarding the inadequacies of the Russell City Energy Center Permit.

Petitioner has functioned as a consultant in Power plant licensing cases for the County of Alameda, the City of Hayward, Chabot Las Positas Community College, Golden Gate University, the Audubon Society, Hayward Area Planning Association, Communities for A Better Environment, Citizens Against Pollution, California Pilots Association, Californians for Renewable Energy as well as other community groups.

Petitioner believes that he brings a perspective to licensing cases that is often otherwise unavailable to persons involved in their first siting. It is his intent to provide an independent and informed citizens perspective to the licensing process and hopes that the public can participate to ensure that any plant licensed in California at minimum observes State and Federal requirements for the public protection and preservation of the environment. Petitioner desires to assure that the Carlsbad Energy Center employs Best Available Control Technology, site specific integration and provides full mitigation for all air quality and other identified impacts from the Energy Center. Petitioner will fully participate in the proceeding. Petitioner desires to present evidence and cross examine witnesses. Petitioner is represented by himself at this time. Petitioner agrees to electronic service. Petitioner was an intervener in the original AFC for this proceeding.

Respectfully submitted on October 8, 2014 By

Rob Simpson
