

## DOCKETED

<b>Docket Number:</b>	16-BSTD-06
<b>Project Title:</b>	Updates to the 2019 Time Dependent Valuation of Energy
<b>TN #:</b>	215933
<b>Document Title:</b>	2019 TDV 2-13-17 Update File Explanations
<b>Description:</b>	Brief explanation of the changes to the files.
<b>Filer:</b>	Adrian Ownby
<b>Organization:</b>	California Energy Commission
<b>Submitter Role:</b>	Commission Staff
<b>Submission Date:</b>	2/13/2017 10:25:09 AM
<b>Docketed Date:</b>	2/13/2017

## Update File Explanations:

- Updated TDV Model
  - *TDV\_2019\_Update\_Model\_2\_10\_17.xlsx*
  - This is the working model with the formula correction that fixes the T&D allocators
- Updated TDV Outputs
  - *2019\_TDV\_Update\_20170210.xlsx*
  - This contains all TDV outputs (Res, Non-Res 15 Year, Non-Res 30 Year). Note that only electricity TDVs have changed. No changes to natural gas or propane TDVs.
- Summary Graphs
  - *Summary Graphs.xlsx*
  - This file visually depicts the changes and relative magnitude. It contains graphs for each of the 16 climate zones for res, non-res 15 yr, and non-res 30 yr. It shows the average daily TDV shape for the old (incorrect) shapes and the new (correct) shapes. You will notice that the shapes have moved slightly into the evening. For some climate zones there is relatively little change.
