Subject line:

2016 Existing Buildings Energy Efficiency Action Plan Update Adopted and Now Available on the California Energy Commission Website

Text of message to be sent:

The newly adopted *2016 Existing Buildings Energy Efficiency Action Plan Update* has been posted at <http://www.energy.ca.gov/ab758/>. The update was prepared pursuant to Senate Bill 350 (De León, Chapter 547, Statutes of 2015), as codified in Public Resources Code Section 25943 (f) (2). This provision requires the California Energy Commission to provide an update to the existing buildings program by January 1, 2017, and at least every three years thereafter.

This is the first update to the *2015 Existing Buildings Energy Efficiency Action Plan* adopted by the Energy Commission in September 2015, to satisfy requirements in Assembly Bill 758 (Skinner, Chapter 470, Statutes of 2009) for a comprehensive energy savings program for California’s existing buildings. The update summarizes the implementation of the existing buildings’ program over the last 15 months, provides an overview of future activities, and updates strategies and timelines.
