Hazardous Materials Management

CECP Public Workshop Day 2

Dr. Alvin Greenberg Input during
Session I – Visual Resources

Carlsbad Fire Department requested modifications to the licensed CECP included: width of lanes (both lower and upper perimeter roads); angle of regression to 25-ft below grade facility (45% vs. verticle 90%); water deluge and sprinkler systems apparatus along entire upper perimeter road, back-up water sources and supply multiple facility entrance and exit points; haz mat training and design features facilitating property haz mat management

Dr. Alvin Greenberg and Carlsbad Fire Dept. Chief Lopez both provided discussed the importance of the modified **Worker Safety / Fire Protection** dsection of the amended CECP during the evening session of Day 1 regarding necessary modifications of the power plant design, and the series of discussions held between NRG and the Carlsbad Fire Department (CFD) in terms of improvements to the licensed CECP project, including design modifications that resulted in enhanced safety features supported by the CFD; these modifications found in the amended CECP resulted in CFD support for the project, and have been subsequently. supported by Dr. Greenberg on behalf of the Energy Commission staff.
