AMENDED CARLSBAD ENERGY CENTER PROJECT 07-AFC-06C

TERRAMAR STATUS REPORT 1- October 1, 2014

Terramar has submitted 5 Data Requests to the Ca. Energy Commission staff as of Sept. 30, 2014. Two of these Data Requests were in the area of Visual, one in Noise, one in Water and one regarding regulations. This last request may fall under the area of Compliance. We were not sure what category this Data Request fell under and hope staff will help classify Data Request 5 properly.

Terramar understands that the PDOC is not available from the San Diego Air Pollution Control District. Once this document is published, there may be questions submitted regarding the subject of Air Pollution.

We thank staff for having the September workshop in Carlsbad, Ca. It was very helpful. We also thank staff for all the helpful information we were provided.

Terramar still contends that neither the CECP nor the Amended CECP is coastally dependent and does not belong on the coastline.

Respectfully submitted by,

Kerry Siekmann
