2016 IEPR Update

It will take a whole lot more than tinkering with grid priority and production tax credits to stop the madness of burning and inhaling a priceless, irreplaceable resource, to meet energy demand for billions: <http://euanmearns.com/bp-2016-global-energy-production-at-a-glance/>.

Until the CEC IEPR identifies a clear path towards compliance with AB 32 and Executive Order B-30-15, as previously recommended in the following comments, California will continue to be a major contributor to global emissions, without a credible, timely plan for compliance with State and Federal law:
