In the matter of: ) Docket No. 16-NSHP-01
Revision of Guidebook for the New Solar Homes Partnership Program (NSHP) ) NOTICE OF COMMITTEE WORKSHOP
) RE: NSHP GUIDEBOOK

Notice of Workshop on Proposed Changes to the Guidebook for the New Solar Homes Partnership (NSHP)

November 2, 2016
9:00 AM
CALIFORNIA ENERGY COMMISSION
1516 Ninth Street
First Floor, Charles Imbrecht Room
Sacramento, California 95814
Wheelchair Accessible

Remote Access Available by Computer or Phone via WebEx™
(Instructions below)

Purpose
Proposed Changes

Several important changes and streamlining efforts were made in this tenth edition of the New Solar Homes Partnership (NSHP) Guidebook as compared with the July 2015, Ninth Edition of the NSHP Guidebook. The Tenth Edition of the NSHP Guidebook is anticipated to be considered by the Energy Commission at its December 14, 2016, Business Meeting and, if approved, become effective January 1, 2017. The proposed changes are summarized below:

Incentive levels:

- Incentive level decline will end at step 8 for both Market-Rate and Affordable Housing projects.

Incentive Calculations:

- Projects will use the Flexible Installation (FI) calculator to determine their incentive. This calculator will multiply the Alternating Current (AC) system size by the incentive level that applies to their project. This calculation will also adjust the incentive to take into account performance based on the project’s geographic location as well as any shading.
- The California Energy Commission’s PV Calculator will be discontinued and no longer an option for new projects.
- The additional incentive for west-facing systems will be discontinued.
- The partial payment incentive process will be discontinued.

Incentive Disclosure Form:

- All projects where payee is not the end-user will require completion of the Incentive Disclosure Affidavit.

Energy Efficiency:

- Includes only code-compliant option for projects meeting 2016 Building Energy Efficiency Standards, under Title 24, Part 6 (2016 code-compliant).
- For 2016 code-compliant projects, compliance must be met before taking the Photovoltaic (PV) credit. This can be identified by noting whether the Energy Design Rating (EDR) of the “Proposed Design” is equal to or lower than the EDR of the “Standard Design.” The EDR calculations are generated as part of the Title 24 Report (CF-1R).
- For projects considered under 2013 Building Energy Efficiency Standards, (2013 Building Code projects), removing 30 percent space cooling requirement in order to achieve the Tier II energy efficiency level.
- Code-compliant projects may provide proof of energy efficiency verification through either the Certificate of Occupancy or completion of the required CF-3Rs in an approved California Home Energy Rating System (HERS) Provider Registry.
• Restricts 2013 Building Code common area projects to code-compliant incentive level only.

PV System Eligibility:
• Only systems installed with azimuths between 90 degrees and 280 degrees will be eligible for incentives.
• Increases the amount of time that the solar permit may be applied for from 60 days to 120 days after the issue date of a certificate of occupancy.

PV Field Verifications:
• Increase allowed sample group size to 1 in 15 (open group) for the field verification sampling approach.
• Allow Energy Commission identified established installers to complete an attestation for each site certifying the system meets program requirements and operate satisfactorily in lieu of the current NSHP PV-2 form.
• The Energy Commission will reserve the right to bar noncompliant installers from future program participation.

Affordable Housing Projects:
• Remove the requirement for tax-exempt status to allow all affordable housing residential projects with a qualifying regulatory agreement to receive the affordable housing incentive rate for the residential units that are subject to the conditions of the regulatory agreement.
• Reintroduce the common area incentive for affordable housing common area projects for the first 30 kW AC of an eligible system. To be eligible for the affordable housing common area rate, at least 75 percent of residential units in the project must be subject to the conditions of the regulatory agreement.

Projects Located in Disadvantaged Communities:
• Offer an incentive bonus to affordable housing projects located in disadvantaged communities identified through CalEnviroScreen.

Background
Senate Bill 1 (SB 1) (Murray, Chapter 132, Statutes of 2006), established the California Solar Initiative (CSI) with the goals of (1) installing solar energy systems with a generating capacity equivalent to 3,000 megawatts, (2) establishing a self-sufficient solar industry within ten years, and (3) placing solar energy systems on 50 percent of new California homes by 2020. The CSI is being implemented by the Energy Commission, the California Public Utilities Commission (CPUC), and the state’s local publicly owned electric utilities in different programs that share the same broad goals.
The NSHP Program is the Energy Commission’s component of the CSI and is limited to solar on new residential construction. Launched in January 2007, the NSHP is the only remaining active program under the CSI. The program provides financial incentives for homeowners, builders, and developers to include solar energy systems on new, energy efficient homes that will contribute to the CSI goals.

In 2015, Senate Bill 83 (SB 83) (Committee on Budget and Fiscal Review, Chapter 24, Statutes of 2015), and the subsequent CPUC Final Decision 16-06-006, extended the life of the NSHP, directing the investor owned utilities to collect additional ratepayer funds necessary to achieve the $400 million in program funds originally authorized under SB 1. The NSHP seeks to achieve 360 megawatts of installed distributed solar photovoltaic electric capacity by the end of 2021.

This workshop will provide information on planned updates and solicit stakeholder input to ensure that the program design for NSHP adequately addresses stakeholder considerations, updates to the Energy Efficiency Requirements in the California Building Code, and current market conditions in the solar photovoltaic and new construction industries. The NSHP requirements are set forth in the NSHP Guidebook. A copy of this draft Guidebook will be available prior to the workshop at http://energy.ca.gov/renewables/16-NSHP-01/documents/index.html.

Public Comment

Oral comments are encouraged during the workshop, and may be limited to five minutes per speaker. All comments may become part of the public record in this proceeding. Written comments should be submitted to the Energy Commission’s e-commenting online system no later than 5:00 p.m. on November 9, 2016.

2. Click “Comment on a Proceeding” in the Additional Information box.
3. Type “16-NSHP-01” into the Select a Proceeding field then hit Enter.
4. Click “Select” to Select a Proceeding.
5. Click “Continue” to Add a Comment.
6. Commenters are required to input their full name, email address, and comment title. Comment title should be “Jane Doe or Company Name Comment re NSHP Workshop.”
7. Type comments into the “Comment Text” field or upload a document with comments. Comments should be in a downloadable, searchable format such as Microsoft® Word (.doc or .docx) or Adobe® Acrobat® (.pdf).
8. Enter the CAPTCHA that is used to prevent spamming on the website. Then click on “Agree and Submit your Comments”.

Written comments will also be accepted before or at the workshop. However, Energy Commission staff may not have time to review them before the conclusion of the meeting. For additional information, see Standing Order re: Proceedings and Confidentiality Procedural Requirements for Filing, Service, and Docketing Documents.

Additionally, written comments will be posted to the Energy Commission’s website for the proceeding. Please note that your written and oral comments, attachments, and associated contact information (for example, your address, phone, email, etc.) become part of the viewable public record. This information may become available via Google, Yahoo, and any other search engines.

If you prefer, you may send a paper copy of your comments to:

California Energy Commission
Dockets Office, MS-4

Public Adviser and Other Commission Contacts
The Energy Commission's Public Adviser's Office provides the public assistance in participating in Energy Commission proceedings. If you want information on how to participate in this forum, please contact the Public Adviser, Alana Mathews, at PublicAdviser@energy.ca.gov or (916) 654-4489 (toll free at (800) 822-6228).

If you have a disability and require assistance to participate, please contact Poneh Jones at poneh.jones@energy.ca.gov or (916) 654-5146 at least five days in advance.

Media inquiries should be sent to the Media and Public Communications Office at mediaoffice@energy.ca.gov or (916) 654-4989. If you have questions on the subject matter of this meeting, please contact Elizabeth Hutchison, Elizabeth.Hutchison@energy.ca.gov or (916) 654-3838.

Remote Attendance
You may participate in this meeting through WebEx, the Energy Commission's online meeting service. Presentations will appear on your computer screen, and you may listen to audio via your computer or telephone. Please be aware that the meeting may be recorded.

To join a meeting:

VIA COMPUTER: Go to https://energy.webex.com and enter the unique meeting number: 922 324 227. When prompted, enter your name and the following meeting password: meeting@9.
The “Join Conference” menu will offer you a choice of audio connections:

1. To call into the meeting: Select "I will call in" and follow the on-screen directions.
2. International Attendees: Click on the "Global call-in number" link.
3. To have WebEx call you: Enter your phone number and click "Call Me."
4. To listen over the computer: If you have a broadband connection, and a headset or a computer microphone and speakers, you may use VoIP (Internet audio) by going to the Audio menu, clicking on “Use Computer Headset,” then “Call Using Computer.”

VIA TELEPHONE ONLY (no visual presentation): Call 1-866-469-3239 (toll-free in the U.S. and Canada). When prompted, enter the unique meeting number: 922 324 227. International callers may select their number from https://energy.webex.com/energy/globalcallin.php.

VIA MOBILE ACCESS: Access to WebEx meetings is now available from your mobile device. To download an app, go to www.webex.com/products/web-conferencing/mobile.html.

If you have difficulty joining the meeting, please call the WebEx Technical Support number at 1-866-569-3239 or https://help.webex.com.

Availability of Documents
Documents and presentations for this meeting will be available online at: http://energy.ca.gov/renewables/16-NSHP-01/documents/index.html.
