SCE's Comments on CED Docket 16-RGO-01: Regional Grid Operator and Governance Workshop, May 6, 2016

SCE appreciates the California Energy Commission and the Governor's office in hosting the workshop on May 6 to discuss CAISO governance necessary for regional expansion. The papers from CA Commissioner Mike Florio and WA Commissioner Ann Rendahl highlight various governance issues that must be addressed to support CAISO expansion and the role State Commissioners. The paper from Tony Braun with the California Municipal Utilities Association highlights the role of public utilities and the electric grid. Finally, the paper from Ron Binz offers some ideas on governance. The information provided will assist in development of a governance proposal. SCE looks forward to participating in a continued stakeholder process and the development of a specific proposal of governance.
