DOCKETED

Docket Number: 17-BSTD-02

Project Title: 2019 Title 24, Part 6, Building Energy Efficiency Standards Rulemaking

TN #: 223413

Description: N/A

Filer: System

Organization: NLCAA

Submitter Role: Public

Submission Date: 5/10/2018 8:05:52 AM

Docketed Date: 5/10/2018

Additional submitted attachment is included below.
Thank you to the commission staff for your efforts and the opportunity to provide comments on this docket. I apologize that they are coming in late, please consider adding a clarification in the 2019 BEES.

Please provide a clarification for EXCEPTION 1 to Section 130.1(a)2

There have been many misinterpretations regarding this exception, and now it has changed again in the 2019 BEES. Can you please add clarity to the code verbiage?

**2019**

**EXCEPTION 1 to Section 130.1(a)2:** For psychiatric and secure areas in healthcare facilities, malls and atria, auditorium areas, retail merchandise sales areas, wholesale showroom areas, commercial and industrial storage areas, general commercial and industrial work areas, convention centers, and arenas, psychiatric and secure areas in healthcare facilities, and other areas where placement of a manual area control poses a health and safety hazard, the manual area control may instead be located so that a person using the control can see the lights or area controlled by that control, or visually signal or display the **current state of the controlled lighting**.

Please define what “current state” means; i.e. ON, OFF, Dimmed?
Does the light level of controlled lighting (i.e. dimmed to 50%) need to be displayed to show a reduced light level of the controlled lighting?

**2016**

**ANNUNCIATED** is a type of visual signaling device that indicates the on, off, or **other status of a load**.

Please define what “other status of a load” means; i.e. ON, OFF, Dimmed?

Thank you for any and all considerations,

Michael Scalzo
