Docket Number: 17-EVI-01

Rural context for EV charging stations

Our company is concerned that there are more obstacles/challenges to install and operate EV charging stations in rural areas and in outlying areas of the County. It would be helpful and more valuable to offer additional incentives or a larger rebate pool for EV charging stations that serve these pockets where both access to electricity and internet service are complicated AND time consuming, compared to urban commercial centers which typically benefit from this program.
