Subject: RE: Carlsbad_revised_FDOC.pdf
Attachments: Carlsbad Energy-Corrected Notice.pdf; Carlsbad Energy Ctr-FDOC Notice.pdf

Hello Matt,

We did not issue a revised FDOC. We issued a revised Notice of Issuance only (attached) that corrected a typo in the original notice in the second paragraph identifying the approved plant as combined-cycle. It was, however, correctly stated in the more detailed equipment description in the original notice that the turbines are simple-cycle design and of course is correctly identified throughout the FDOC as being simple-cycle. A copy of the original notice is also attached for comparison.

Let us know if you have any further questions. Thanks,

Nick Horres

Associate Air Pollution Control Engineer

Nick,

Can we get an official renote and errata sheet?

Thanks,

matt

Do we have a cover letter that goes with this revised FDOC that explains the changes so we can say to the Commission that there is no actual change to the FDOC? Thanks.

Jeff
