More information about the November 8 Business Meeting, including the full agenda and instructions for participation, will be made available on the Energy Commission's website at: [http://www.energy.ca.gov/business\\_meetings/](http://www.energy.ca.gov/business_meetings/).

Senate Bill 350, the Clean Energy and Pollution Reduction Act of 2015 (De León, Chapter 547, Statutes of 2015), requires the California Energy Commission to establish annual targets that will achieve a cumulative doubling of statewide energy efficiency savings and demand reduction in electricity and natural gas final end uses. This report establishes the proposed statewide doubling targets for electricity and natural gas end uses that will be achieved by 2030. It proposes sub-targets for the portion of projected energy efficiency savings that can be achieved through programs funded by the state's investor-owned and publicly owned electric and natural gas utilities. The report also proposes sub-targets for programs funded through sources other than utility rates. In addition, the report identifies projected non-utility efficiency savings from the industrial and agricultural sectors. The report outlines recommendations to ensure that California will meet the SB 350 energy efficiency doubling targets.

## Public Comment

**Oral Comments:** The Energy Commission will accept oral comments during the business meeting. Comments may be limited to three minutes per speaker. Any comments may become part of the viewable public record in this proceeding and may become available via Google, Yahoo, and other search engines.
